LLG trial — instructions

Getting the first businesses onto MaketPles ENB through the LLGs

Every LLG Business Development Officer finds at least one business in their LLG, fills in the paper form with the owner, and enters it online with photos. The entry goes straight to the Division for review. There are 20 LLGs and the launch target is 35 businesses, so ask each officer for two where they can.

1. Print

FILE	HOW TO PRINT	SHEETS
print-guides-single-sided.pdf	A4, single-sided	20 — one officer guide per LLG
print-forms-double-sided.pdf	A4, double-sided, flip on long edge	20 — each LLG's form on two sheets
sme-entry-form.pdf	A4, double-sided — a few spares	For an officer's second business
llg-tracking-sheet.pdf	A4 landscape, single-sided	1 — kept by the Division

Each guide and form already shows its LLG and district. The by-llg folder has the same for one LLG at a time, if you need to reprint just one. Photocopies in black and white are fine.

2. Before handing out

1. Fill in the return box on every guide: the return date, who it goes to at the Division, where to send photos, and a phone for questions. Allow about three weeks before the conference for review.
2. Check the LLG names against the Division's list.
3. Give each officer their LLG's guide and form, plus a spare form.
4. Write each officer's name and mobile on the tracking sheet.

3. What the officer does

1. Chooses a business and visits it (the guide explains who to choose and what to tell the owner).
2. Fills in the paper form with the owner, takes the photos, and both sign.
3. Enters the form online with the photos (page 2 of these instructions).
4. Writes the online reference (for example ENB-A1234) on the paper form and keeps it for their records.

Entering a business online

For LLG Business Development Officers — on a phone

OPEN THIS ADDRESS

market-remix.lesleywaninara.workers.dev/register?officer

Save it to the phone's home screen. Type it exactly, including ?officer at the end — that adds the officer's section and tells the Division the entry came from an LLG officer.

Step by step — copy from the paper form

1. About the business: name and district; then choose the LLG from the list (or "Not sure") and type the ward or village in its own box; then how long trading, staff, its category and type, and the owner's description from section 4.
2. Contact: the owner's name, mobile and email if any.
3. Registration: IPA status, and the IPA number if they have one.
4. What they sell: each product with its price in kina, what the price is for (each, per kg, per bundle), and how many they have.
5. Photos: up to 12, made smaller automatically so they send on a weak signal. With one product, its photos go to it by themselves. With more than one, choose under each photo which product it shows — or the owner at work, or the wide photo of the place. The form reminds you if a photo isn't sorted, or if there is no photo of the owner or the place.
6. Check and send: check everything, enter your own name, mobile and the paper form number, tick that the owner signed the paper form, and press Send.
7. Write the reference shown (for example ENB-A1234) on the paper form. Press "Register another business" for the next one — your name and mobile are remembered on that phone.

If there is no signal

- If sending fails, stay on the page and press Send again when the signal returns. Nothing is lost while the page stays open.
- If there is no coverage at all, keep the paper form and enter it later where there is signal — or return the form and photos to the Division as the guide's return box says.

Good to know

- Nothing appears on the website until the Division has checked and approved it.
- Never type a bank account number or PIN into the form.

Reviewing entries

For Division staff — in the Division panel (admin.html)

Each new entry

1. Division panel (market-remix.lesleywaninara.workers.dev/admin) → Business applications. Entries from officers are labelled "LLG officer"; the note shows the officer's name, mobile, paper form number and the IPA number.
2. Phone the owner on the number given. Confirm the details, that they agreed to be listed, and the prices. Aim to do this within 2 working days so officers see results.
3. Open the entry. Check the LLG and ward, and under each photo check what it shows: the menu lists the products by name, plus me / my stall and front page. Fix any photo before approving.
4. Approve & create account — or Return to applicant with a note saying what is needed. If photos are missing from the listing afterwards, open the application again and press Move photos again.
5. Listing review: check each product (photo, description, price) and Publish it.
6. Businesses → open the business → Seller login → Create login. Give the owner the login and temporary password in person or by phone; they choose their own at first sign-in.
7. Tick the business off on the tracking sheet.

Each week

- Launch progress screen: shows how many businesses per industry (target 5 in each of the 6 categories) and per district. Tell officers what is missing — for example "we need a guest house from Pomio".
- Phone officers whose LLG has nothing yet.

Keep in mind

- The officer's address is open to anyone with the link, but nothing goes public without Division approval. Reject anything you cannot confirm by phone.
- Unregistered businesses can be approved during the pilot, case by case.
- Sample businesses on the site are placeholders; they are removed before launch.
- To take a business off the site: Businesses → Open → Remove from site. Its records are kept and it can be put back. Delete permanently is for test entries with no orders only, and only Division admins see it.
