Photo guide — what to take for each business

For LLG officers and business owners. Up to 12 photos per business.

Good photos sell. Buyers cannot touch or smell anything online, so the photos have to show what they get. A phone camera is fine.

Every business	1 of the owner at work, at the stall, garden, boat or workshop: this is the photo that makes it real. 1 wide photo of the place, held sideways, with empty space on the left for the website heading.
Light	Daylight, outside or by a door. No flash. Not into the sun, and not in dark shade.
Frame	Hold the phone steady and fill the frame with the thing being sold. Plain background: a cloth, a mat, a clean table.
Clean	Wipe the camera lens. Clear away rubbish, bags and other people's things.
Ask first	Ask before photographing anyone. No children without a parent's okay. No ID cards, permits or bank papers.

Sending them: in the online form, choose under each photo which product it shows, or "owner at work" or "wide photo". If photos go by WhatsApp or email instead, name them DISTRICT_Business_subject_01.jpg — for example GAZELLE_Abuta_seedlings_01.jpg — or start the message with the business name. A business with more than one type (a fish farm that also keeps chickens): follow each row, still up to 12 in all.
